Dear Sirs

ABC279

19/8

In August this year, you fitted a Silent Gliss electric curtain system. We were not aware that the wood that you fitted them too was wet/warped. We subsequently replaced the wood but now the curtains do not operate properly.

Can you arrange to look at this as soon as possible.

We have vertical blinds on the same window, and I would like a quote for venetian blinds to match another window in the kitchen. I would also like a price option for electric blinds.

I have attached images of the windows referred to.

I look forward to hearing from you

Kind Regards

Neil
