Hi Nicola,

Further to our conversation this morning,

if we change the colour to Unilux Imperial on the Bedspace blinds to match the side room blinds then the 5nr blinds with the longer drop will need to have a horizontal join in the fabric approx. 175cm from the bottom of the blinds, is this ok?

This is normal procedure when using this colour, if you stick with Grey then there would be no joins as this fabric comes in a wider width.

Please advise?

Best regards
Gary
