Quotation Date : 30/01/2023
Expiry Date : 28/02/2023
Reference# : Window Film 5666_Heat Reduction

Thank you for inviting us to provide you with this quotation, I am pleased to offer the following solutions below.

#	Item & Description	Qty	Rate	Amount (excl. VAT)
1	<p>Hanita Silver20 A silver reflective mirror film providing high levels of glare and heat reduction along with one-way daytime privacy.</p> <p>Performance on Clear Double Glazed Units :</p> <ul style="list-style-type: none">• Visible Light Transmission - 15%• Internal Reflection - 58%• UV Rejection - 99%• Heat Gain Reduction - 58%• G-Value - 0.31• Total Solar Energy Rejection - 69%• Glare Reduction - 81% <p>12 year Installation Warranty against bubbling, crazing and peeling when installed by a Approved Dealer.</p> <p>Total cost to supply & fit to, 1 x 1230mm wide x 1770mm and 1 x 1270mm wide x 1770mm, is :</p>	1.00	223.00	223.00
2	<p>SolarGard TrueVue30 The TrueVue range from SolarGard has low internal reflectivity when compared to other metallic solar control films which provides a more natural internal appearance especially at night time.</p> <p>Performance data on Double Glazed Unit :</p> <ul style="list-style-type: none">• Visible Light Transmission - 29%• Internal Reflection - 14%• UV Rejection - 99%• Heat Gain Reduction - 39%	1.00	325.00	325.00

#	Item & Description	Qty	Rate	Amount (excl. VAT)
	<ul style="list-style-type: none">• G-Value - 0.46• Total Solar Energy Rejection - 54%• Glare Reduction - 65% <p>12 year Installation Warranty against bubbling, crazing and peeling when installed by a SolarGard Approved Dealer.</p> <p>Total cost to supply & fit to, 1 x 1230mm wide x 1770mm and 1 x 1270mm wide x 1770mm, is :</p>			

Project Requirements: Heat and Glare Reduction

Further to your requirements of heat reduction, please find film specifications above, along with the cost to supply & fit each film type, subject to site survey and assuming the glazing specification will be suitable for an internal application.

Glare Reduction. The darker the film, the lower the visible light transmission and the more glare that will be reduced.

Solar Gain. The ability of a window (or window with film) to reflect and absorb solar gain is called Total Solar Energy Rejection. The solar gain which actually passes through the window is known as the Solar Heat Gain Coefficient or G-Value. The reduction of actual solar heat gain by a window film is therefore the percentage reduction in G-value.

Costs assume work in normal office hours with clean and clear access to all windows in one project visit.

Terms & Conditions

Attached in separate document on your email.

All prices are subject to VAT at 20%.

Window film is outside the scope of CIS and hence the VAT Reverse Charge does not apply.

50% Deposit required.
