**Subject:** RE: Estimate for awnings & shutters

Hi Valentina,

Thanks for your email.

Our most popular and least expensive plantation shutters are MDF which are not available with locks, although in the past we have purchased locks from elsewhere and installed them on these shutters ourselves. I will base the figures on this option.  
Plantation shutters from the MDF range and hidden tilt mechanism: £1060.00 (not including locks).  
Shutter figures are inclusive of vat & installation.

The awning proposed was a drop arm, we can make this awning so it doesn't interfere with your opening doors. We can also do a folding arm awning which has a minimum size of 2.0m wide x 1.5m projection. All these awning will have a full cassette and is available in both electrically operated and manual. I will base the figures on a folding arm awning for now.  
Manual: £1500.00 Electric: £2140.00 Plus £250.00 installation INC vat

Delivery for shutters is approximately 12 weeks and awnings 4 weeks from receipt of your order.

Please let me know if you would like to make an appointment with me, I am fairly flexible this week.

If you have any queries please don't hesitate to contact me.

Kind Regards

Good morning Valentină,

Thank you for your enquiry for shutters and an awning, I would firstly like to point out that Plantation Shutters all though can be locked do not offer any real security as they are a lightweight product and can very easily be broken through and therefore would not recommend them being used as a security product especially over night with your main doors open.

In respect of the awning by the sound of what you have in mind is an awning that drops down at a fairly steep angle as it is opened, basically what is known as a drop arm awning, as your doors open out this type of awning is generally not suited as the doors would interfere with its operation when open, I have attached a couple of images showing how the awning operates and drops down directly in front of the door.

The best option for this type of situation is an awning that projects approximately 2.5mts with an overlap of approximately 500mm each side of the aperture to give the best protection.

We would be more than happy to arrange a site visit us to assess and advise what may be best for your situation, I can assure you that we would not put you under any pressure whatsoever as well as giving completely unbiased and free advice.

Please let us know if you would like to arrange this and we will then be able to arrange a mutually convenient time with you.

Best regards

BEN BAKER

Good evening,

I am writing for 2 reasons.

I'm looking for supply (and installation) of full height plantation shutters to go within my patio door recess space. **I need the shutters to have a lock in the middle, with a key**, to make sure they can be locked at night in the summer when the patio doors are open (they open out). If this is possible can you send me a quote? If you see one of the 2 pictures attached (the blue curtain will be removed), the recess space is approx. 1m 53cms wide and 2m 4cms high. For the panels, I would like 4 panels - 2 left and 2 right.

Also, I would like a 2 meters wide outdoor awning to be attached to the wall above my balcony doors - see pic enclosed- as it gets very sunny and hot, with a projection of 1 metre 20 cms forward but not too curvy. Completely attached to the wall so that when it rains the water doesn't go through, so the cassette, whether half or full, I don't want it to have gaps, I can send you a photo of the one my neighbour has. I need installation too as I'm not capable.

If you can help, can you send me a rough estimate please?

Thank you
