			1	PLEASE NOTE: - THIS QUOTATION IS EX-WORKS SHY, DELIVERY IS NOT INCLUDED. We will work with you to source the best value door to door courier delivery, but the risk of catastrophic damage to the hand made 200+ series head boxes is too great for Tuffnells or similar to be considered. If you have contacts that can collect from us, these would be welcome.			£0.00	£0.00
			1	These blinds all use the SOMFY FTS system. Please be aware that there are ongoing supply chain issues effecting motors and controls which may extend the required lead time, but this will be discussed and confirmed at the point of order.			£0.00	£0.00
Shelving is not included in this order. For our new shelving pricing, please contact a member of the team.								
							Delivery	£0.00

Delivery: 4 Working Weeks

Currency: GB Pounds

Total: 11,652.93

Price valid: 6 months

Payment Terms: 30 Days date of Invoice

E & O E

SHY® ZIP® - FTS - Electric Rooflight

SHY® ZIP SCREEN® Fabric Tensioning System Rooflight Blind, consisting of two square head boxes one containing cloth roll and one containing cable roller with the cloth tensioned against 1.5mm stainless steel cables that will be visible within the opening. With ZIP side channels to the sides. Cloth to have welded SHY ZIP fastener, enabling cloth edges to be held captive within the side zip channel. Blind will open and close normally, without pulling free of the side channels.

Standard Zip-Grey (Blackout)

Standard SHY ZIP in grey suitable for Blackout applications.

Rooflight Shelving

It is recommended to build a shelf around the opening with deep cover at the box ends to hide the boxes, so the system can “sit” on and be squared up on the shelf. This will make installation faster, out of square adjustment simpler and improve the finished look of the system. This can either be our system at an extra cost, or something of your own design.

FTS - Fabric Tensioning System - Somfy (240V.AC)

The Fabric Tensioning System (FTS) is a two motor system that consists of an electronic control box linking the cloth and cable rollers, so the cloth will be drawn across the opening under low tension then applying tension when stopped to bring the cloth taut. Also available as an extra are switches, radio operation and other control equipment, see “Additional Parts Available” for handsets, and control options.

Standard RAL Colours

Powder Coating: Standard colours are White RAL 9910 (60-70% Gloss) & Black RAL 9005 (60-70% Gloss.) All other RAL colours or finishes, will be at an extra cost. Should colour or finish not be held in stock, there will be an additional cost of £200.00 + vat to cover minimum order quantity of pigment.

Fabric Welding

In response to the increased use of Low-E and other specialist glass, and in line with our policy of continuous product development, we are increasing our weld strength settings. This will not have any effect on the strength, integrity or performance of the base fabric or edge ZIP® However, the weld line will have more of a gloss appearance due to the increased heating.

Fabric Choice

SHY (UK) has a wide range of sunscreen, dim-out and blackout fabrics within its range, many of which may be suitable for this project. Please do not hesitate to contact us to discuss your requirements in more detail.
