GF10 & GF11 not measured on site. Although internal doors, they must be external quality as they open to garage.

Structural openings measured on site 09/10/2019.
Site dimensions must be checked & approved by contractor prior to ordering of windows / doors.

APPROVALS
 This drawing is to be used in accordance with the terms and conditions of the contract. It is the responsibility of the contractor to ensure that all dimensions are checked and approved by the contractor prior to ordering of windows / doors.

ENGINEERING
 The drawings are the property of the engineer and are not to be used for any other purpose without the written consent of the engineer. The engineer is not responsible for any errors or omissions in the drawings or for any damage or loss resulting from the use of the drawings.

Chartered Building Engineer
 BASH DEVELOPMENTS LTD

Construction Notes:
 All dimensions to be checked on site prior to order of any materials or detailed design being approved etc.
 All works to be carried out in accordance with the robust detail catalogue for limiting thermal bridging & air leakage.
 All elements of structure are subject to later design by structural engineer under the self-strengthening must be completed prior to commencement of the works.
 All conditions / information contained in planning & building permits must be addressed prior to commencement of the works.
 Building control must be notified at all relevant stages of works in accordance with the building inspection notification framework.
 A health & safety project coordinator (legal) is to be appointed prior to the commencement of work and the H&S must be notified.
 A full risk assessment is to be carried out prior to commencement of work, and method statements to be produced as part of contractor construction phase plan.
 All relevant laws and codes of practice must be strictly adhered to on site.

Design Risk Assessment:
 This project will involve various medium / high risk activities including excavations, working at height and installation of large expanses of glass which must be risk assessed prior to commencement, with comprehensive method statements produced.

The existing building should be supported for hazardous materials and all services should be located and disconnected prior to demolition works commencing.
