FIXING INSTRUCTIONS

CR31886-B2-DF 35893

Customer: C. P. Interiors
Project: Daisy Bank, St Brelade , Jersey
Batch Description: Solar Shading Units

TECHNICAL GUIDE

Dales manufacture a wide range of Eaves products that are the result of research, development and experience. We provide general fixing instructions for our products, as the fundamental design characteristics remain the same, although the appearance can vary greatly on different projects.

However, each project is unique and therefore general instructions, although necessary, do not give sufficient information about the individual project.

Consequently, we have produced this guide to help you to understand our products and systems and also to suggest the sequence of fixing for this particular project.

A "fixings issue list" is included in the box marked 'FIXINGS' with full size illustrations, where possible, for easy identification.

Table of Contents

- Project assembly and fixing sequence drawings for this specific project (Ref: CR31886-CR31886_01C & 2A)
- Dales Solar Shading Systems fixing instructions (general)

Please do not hesitate to contact me should you need any further information.
