## Wallpaper Hanging Instructions

Please read these instructions carefully before hanging this wallpaper. It is advisable that a professional decorator is used.

### 1. Inspect Each Roll

Before cutting and hanging the wallpaper, ensure that all rolls have the same batch reference, are in good condition, with no variation in shade, and that no other faults are present. Please ensure that there are enough rolls to complete the job.

**Do not assume that the wallpaper will come off the roll the correct way up. Always refer to the pattern book or check with your retailer.**

Examination of the paper before hanging is the buyer's responsibility. No claim can be accepted after papers have been cut and hung, for defects which are apparent at the time of hanging. In the event of any complaint, please quote the reference and batch number on this label.

### 2. Preparation

- Walls should be clean, dry and even.
- Remove any old wallpaper and loose paint.
- Roughen painted surfaces with sandpaper.
- Scrape powdery, flaky surfaces. Absorbant surfaces should be prepared with an oil based primer ensuring it dries completely.
- New plaster should be allowed to dry out completely.
- Metallic effects can be damaged if high levels of alkaline are already present in the walls. Preparing the walls with an alkaline resistant primer should prevent any damage of this type.
- For best results, we recommend that the walls are cross lined using a good quality lining paper. Sizing the lining paper will aid adhesion. Lining should be allowed to dry completely before hanging the wallpaper.
- Dark coloured wallcoverings may need their edges coloured with a crayon of a similar tone to avoid white edges showing.

### 3. Pasting

- Romo's Premium Quality Tub Adhesive, or an equivalent good quality, solvent-free, fungicide protected, light grade adhesive should be used.

**DO NOT USE SELF-MIX ADHESIVES. ALL PURPOSE AND HEAVY DUTY PASTES ARE NOT SUITABLE.**

- Apply an even coat of paste to the wallpaper, ensuring edges are fully pasted.

**Do not allow paste to come into contact with the surface.**

- Allow sufficient soaking time for the paper to become supple (5-8 minutes).
- Care should be taken not to crease the paper when folding.

### 4. Hanging

- Hang wallpaper, smoothing it to the wall with a decorator's brush, from the centre of the length to the edges, expelling all air bubbles.
- Butt joins tightly and never overlap. Avoid squeezing paste out of joins.
- **Paste may damage the surface of the wallpaper and cause surface printed colours to transfer. The company cannot accept responsibility for marks or damage caused by paste.**
- Should any paste have been allowed to come into contact with the surface, it should be removed whilst still moist, by wiping gently across the entire surface using a clean, damp sponge.
- Trim top and bottom with a sharp knife or scissors.
- Ensure wallpaper is firmly adhered as, in the event of fire, loose wallpaper can contribute to the hazard.
- After hanging 2 or 3 lengths, inspect the result to ensure that no shading or other faults are present. No claim for hanging costs can be accepted once more than one roll has been hung.

This information has been supplied in good faith, but without guarantee. Site conditions are beyond our control. It is the responsibility of the buyer to ensure that the environment is suitable for the wallcovering.
