on angled roof  
area.

Thanks for sending the notes Ben. Just one point we discussed missing:

### Trees along back fence

There are trees in troughs along back wall of garden that are all root bound / breaking out of the troughs and so we will need a solution for that too.

Rachel,

Hope you are well and had a good weekend.

Unfortunately I'm not going to be there for the appointment with Adrian and the landscaper today – so thought I should scribble some thoughts down that might be useful:

#### 1. Decking replacement

- As discussed with Ben, we are wanting to replace all of the current decking, but also creating a new area in front of the current water feature (which is to be removed) for the new BBQ area (see attached sketch)
- Decking to run from back of house out to the trees – matching the run/line of sight from the house flooring as far as possible
- Also as discussed with Ben, we need to reinforce the decking on the far right hand side (as you look towards the house/next to the outdoor tap) as we will have treadmill and indoor bike located there.
- Level of decking will have to be dropped to have one consistent level across whole of back – which means the artificial grass will need to be lifted and the soil underneath dug out to create new level.

#### 2. Watering system

- We currently have a home install watering system run under parts of the decking – this needs to be kept but may need re-routing properly under the decking once we have the layout sorted.
- There is a pump which needs to be added to the system once the layout is sorted

#### 3. Electrical works

- As mentioned below, we have power outside in the shed already and there is a fuse board inside the shed
