The Slim-line system and Luxury system with MDF subframe have white plastic trims, while other hardwood subframe options come with Trims to match the subframe. i.e. if you have a solid oak subframe the trims are also solid oak.

**Pre-drilling frames:** All face fix and deep face frames are pre-drilled as standard for ease of installation, but due to the unknown nature of the walls of the reveal, all reveal fix frames cannot be pre-drilled. For example there could be electrical wires, gas or water pipes within the walls of the property either side of the existing window.
