Called regarding his insect screen quote

He said he wants to remove the stairs and add back in the downstairs shower (which I think is cloaks). I have hidden and unhidden this on the SO so is showing right.

Living room – he wants to know how this has been divided as not sure 3 windows is right for insect screens? I can see a note on the pink saying cant have venetians AND insect screens so maybe the 3 x 600mm is just for 1 window (as he said it was big), I can see there is a venetian here for another window so that would make sense if 2 windows, would need to chat to Adrian to see

He also said can you separate the living room insect screens onto a separate quote with living room rollers (I think from SO15915) so he can view the living room as a whole? I couldn't see rollers on SO16356.

Kind Regards

Rachel
