LIGHT CONTROL

Santa Fe Dakota shutters offer optimum light control, allowing the perfect amount of light into your room; keep light to a minimum by closing all the louvres or enable light to flow freely through open louvres and panels.

PRIVACY

Your choice of shutter style allows you to enhance your privacy without sacrificing natural light flow by operating the louvres for the top and bottom panels independently. Choosing a café style shutter enables you to have privacy to the bottom half of the window whilst facilitating full light flow through the upper section of the window.

ENERGY EFFICIENCY

Dakota shutters are the perfect way to regulate temperature, the insulation properties of a framed shutter create a barrier to the cool outside air entering the room through the window, whilst a white shutter reflects the heat from the sun's rays in the warmer months.

HANDCRAFTED

Each Dakota shutter is specifically designed enabling you to have the ultimate bespoke shutter showcasing the contemporary colour or wood grain unique to Dakota shutters.

SHUTTERS PROVIDE A SIMPLE, EFFECTIVE WAY TO TRANSFORM YOUR HOME. CREATE YOUR INDIVIDUAL SHUTTER BY CHOOSING A STYLE THAT SUITS YOUR WINDOW AND DESIGN REQUIREMENTS.

Engineered wood shutters manufactured to the highest standard.

Available in 9 colours: 5 painted colours and 4 stunning textured wood grain finishes.

The unique wood grain of each shutter captures the true beauty of natural wood which transcends into your interior decor.

Contemporary urban blade offers enhanced light control, superior closure and privacy.

The superior insulation values of real wood shutters can assist in keeping the cold air out during the winter months.

CHOOSE YOUR STYLE

CAFE STYLE

Designed to cover the lower section of your window, this shutter style will offer a high level of privacy, while allowing natural light flow into the room.

TIER ON TIER

Tier on Tier shutters are designed to allow you to control the top louvre section of your shutters independently from the lower giving you complete control of light and privacy.

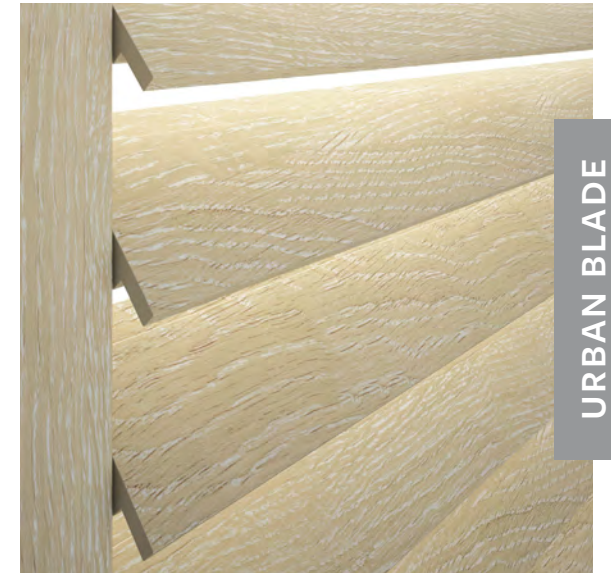

FULL HEIGHT

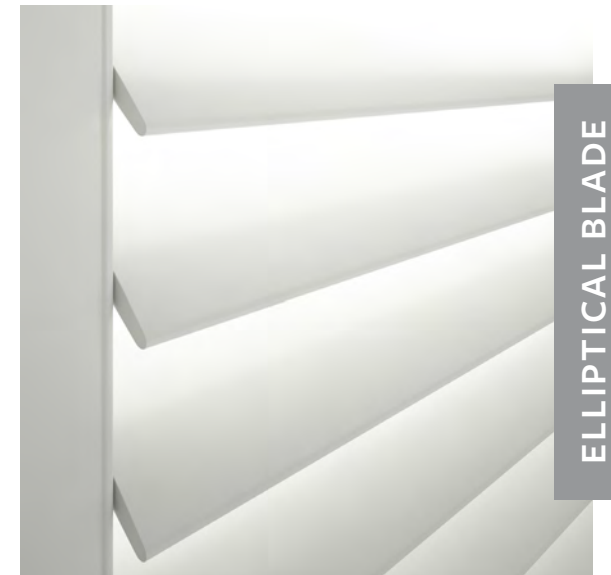

Designed to dress the full-height of the window. Available with a mid-rail, enabling the shutter blades to be operated separately.
