Automated Shaped Blinds

Specialist in Automated Shaped Blinds

Leamington Blinds is a British automated blind specialist. Our vision is simple and honest: we value authentic British craftsmanship combined with the use of the highest quality materials, the latest technology and innovative engineering. We aim to create blinds that will enrich, accent and enhance an interior and meaningfully connect with the people within it.

Apex
Automated Shaped Blind

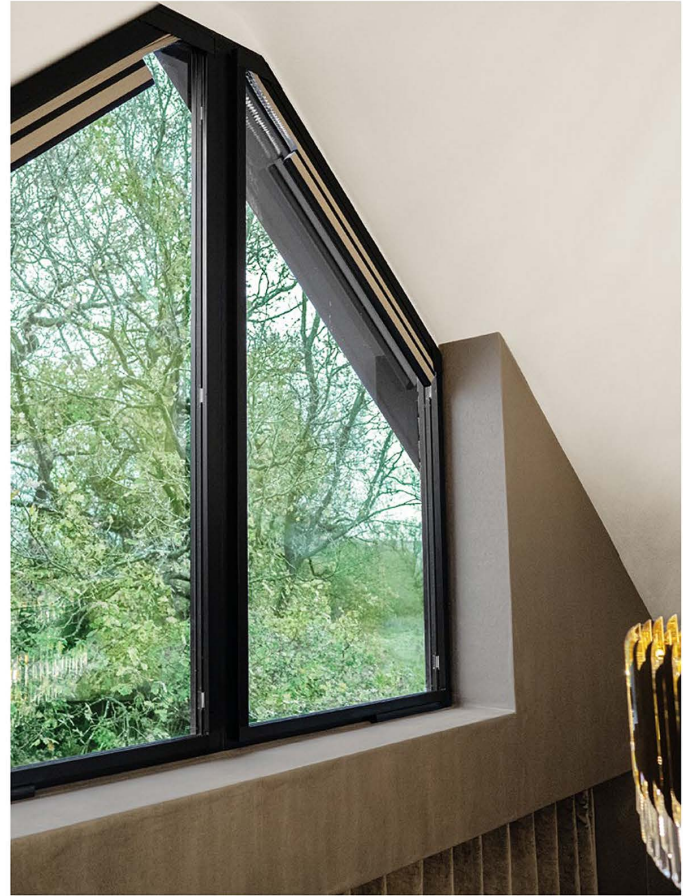

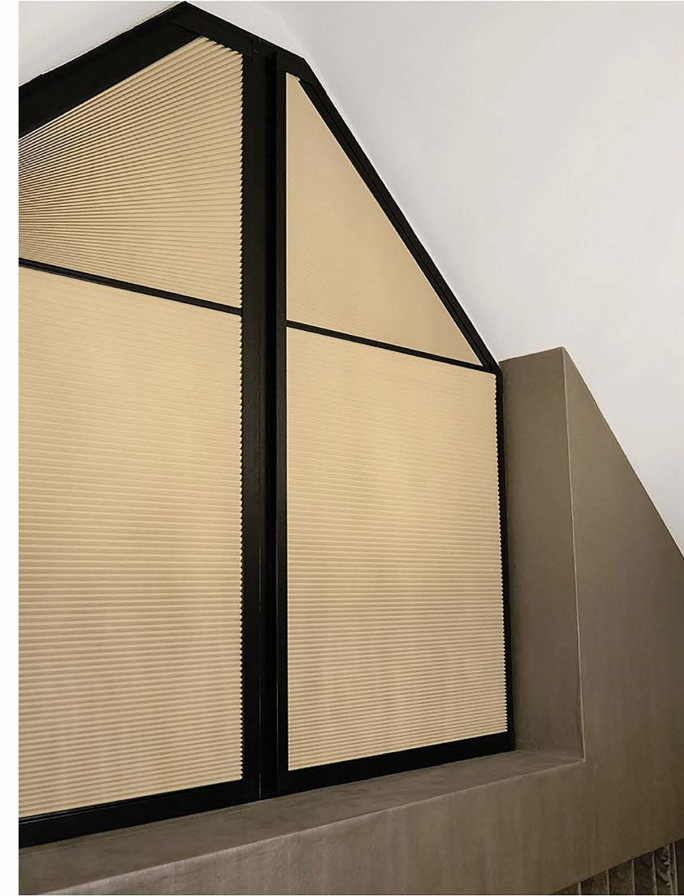

The Ultimate Shaped Blind System

Beautifully engineered electric shaped blind. Using our Patent-Pending system, combined with high quality componentry and British craftsmanship, it offers the perfect solution to enhance any gable-end or apex shaped window design. Fully compatible with most leading home automation systems, this blind can be seamlessly interfaced to provide privacy as well as light control.

Discover the Power of Automation

All products incorporate state-of-the-art technology that allows you to control your blinds exactly how you prefer. Connect with your handset, wall switch or smart device. Link to home automation equipment or a building management system for enhanced energy savings and child-safety.

Powered by Innovation

Tilt & Lift RTS Motor

The Tilt & Lift RTS motor provides raised, lower and intermediate positions with precision controls. This motor can be powered by 3 options; lithium-ion rechargeable battery, solar pack and mains power.

FEATURES	TILT & LIFT
Voltage	12V DC
Power options	<ul style="list-style-type: none">- Standard battery pack- Dual battery pack- Solar pack- Rechargeable battery pack- Lithium-ion rechargeable Battery
Power supply	9v DC – 14v DC
Battery life	4-6 Months Dependent on usage of motor and battery selected
Radio frequency	433.42 MHz
Speed	30 rpm
Adjustable Speed	15 – 30 rpm increment of 1 rpm
Torque	0,8 Nm
Noise Level	56dBA
Motor Size	200mm length

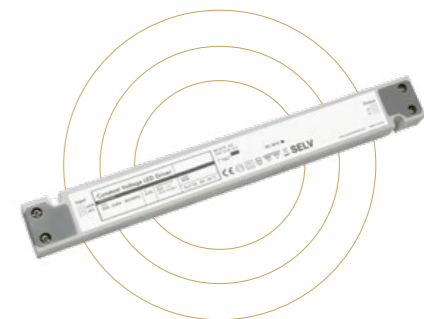

Lithium-ion Rechargeable Battery Pack

Enjoy the convenience of battery power with no requirement for wiring. Once the battery power expires, the rechargeable lithium-ion battery pack is charged with a simple plug-in charger.

Solar Pack

The energy efficient solar wand utilises Lithium-ion battery technology. This patented energy-saving technology uses sunlight to power the motorised blinds and requires charging less frequently.

Mains Transformer

A mains transformer provides a dedicated power supply to the motorised blind. The transformer is hardwired with the supply cable connected directly to the motor.

Simple Integration Complete Control

Integrating our intelligent blind into your Home Automation or Building Management System couldn't be simpler. Our blinds can be operated together with audio-visual, lighting and security mood and scene settings. Common integrations include, Control4, Lutron, Crestron, Google Home and Amazon Alexa.

Whether you're looking at residential or commercial property, automated shading and window blind control can significantly improve a building. Gain flexibility to manage your blinds in a way that benefits you.

A Range of Colours to Suit Any Interior

Our fabrics are designed to add thermal control throughout the seasons. In warmer months, the honeycomb design reflects the sun's rays to keep the room cool, while in winter the cellular structure retains warmth by trapping air and creating an insulation blanket. The result is blinds that are more than just stylish. Save energy, stay warm and keep your room cool with our fabric range.

Blackout

Our blackout fabric is specially designed to shield light entering into the room, providing better privacy, reduced noise and increased sun protection.

Dimout

Our dimout fabric provides privacy and helps diffuse the amount of light entering a space. The perfect solution for those requiring light control.
