**Child Safety and Internal Window Blinds
 Risk Assessment for Supplying and Installing
 Blinds in Commercial Buildings**

Introduction

The standards relating to child safety for internal window blinds will be mandated under the General Product Safety Regulations.

This change will place a legal responsibility on all blind suppliers and professional blind installers to ensure that internal blinds "intended to be installed in premises where children aged 0-42 months are likely to have access or be present" are compliant with child safety standards as detailed in EN 13120.

In order for BRIGHT A BLIND LIMITED to determine what type of blind and operating method will be permissible for your building(s) the following risk assessment must be completed based on your known use of the building(s) at the address shown below.

Organisation Name: DWP
 Site Address: 96 Milton Street
 Block 2 - 4
 Glasgow Glasgow G4 0DX

Based on a risk assessment on behalf of the organisation stated above I confirm:

Please tick the one statement that is applicable and sign and date this risk assessment where indicated:

That children aged 0-42 months are **unlikely** to have access or be present in the building(s) at the address shown above

OR

That children aged 0-42 months are **likely** to have access or be present in the building(s) at the address shown above

OR

That children aged 0-42 months are **likely** to have access or be present in **some areas** of the building(s) at the address shown above.
In this case please complete the assessment overleaf/attached.

Signed: 
 Name: Gordon Peattie
