[WALLPAPER](#) [FABRIC](#) [RUGS](#) [CURTAINS](#) [BLINDS](#) [CUSHIONS](#) [HEADBOARDS](#) [HOMEWARE](#) [OUTLET](#) [THE EDIT](#) [GUIDES](#)

Thank you for using our wallpaper quantity calculator.

Your inputs:

Unit of measure: cm

Wall width: 500

Wall height: 240

Pattern Repeat: 300

Roll width: 68.5

Quantity required:

We estimate you will need: **2** rolls. 0 drops leftover. You may wish to add an extra roll for mistakes and repairs.

Our calculations are based on:

- Allowing 10cm (4in) per drop for trimming top and bottom
- Assuming part widths may be used elsewhere
- We do not allow extra for uneven or sloping walls in our calculations
- No reductions have been made for doors and windows - for large openings only you may wish to adjust your dimensions to suit

We guarantee the accuracy of our calculations based on the measurements provided and our standard assumptions, but you may wish to consult your own decorator or make your own calculations.

If we can be of any help, please get in touch.
