

USER GUIDE

CAPITAL FASCIA

part of Capital Collection

 **MADE IN[®]
BRITAIN**

Fabric: Bexley Jet Set
Capital Fascia: 120 Anthracite

While fashion may be fleeting, style endures.

Capital Fascia offers a modern but timeless touch to any interior window shading, whether in a residential or commercial setting.

Crafted from premium materials, its modular design makes for unbeatable versatility and its six distinct but complementary colours let it integrate into any window.

You can easily tailor it to any window dimensions or configuration, ensuring a cohesive and polished look that will impress even the most discerning of clients.

Which fascia size suits my installation?

Both the 90mm and 120mm variants of the Capital Fascia can be recess or face-fixed as required – the freedom you have in positioning your fascia means it can accommodate any blind type and even more than one simultaneously.

So, which is the right height option for your project?

To determine the variant to choose, the total clearance of the blind and its fixing when in a fully open position should be considered. This will be subject to how the blind is fixed, window size and blind type.

For illustration, we are using a simple range of average roller blinds. The roll widths provided are based on a thick roller fabric such as Quad 1% at a drop of 3000mm.

Capital Fascia configurations that require Straight Joiners

Joined

Join the revolution

Straight Joiners make transportation of fascia panels easy, allowing you to join long lengths on site. Also used to connect full lengths of fascia (max 6m) for wider constructions.

Capital Fascia Side Profile components

Side Profiles

Reduce light leakage in style with the Capital Fascia Side Profile. Positioned behind or in front of a recess-fixed blind, the profile eliminates gaps for complete privacy and greater light control. Fit a matching colour in front of a fascia panel for a clean and cohesive finish. Compatible with all panel options.
